

Arenastone

NSF/ANSI 51 CERTIFIED

WHO IS NSF INTERNATIONAL

NSF International is an independent, non-profit organization dedicated to public health safety and protection of the environment. As a "third-party" provider of certification services, NSF is not a government agency and is not controlled by industry. This independent status guarantees that the equipment is tested and evaluated by a completely impartial agency.

What does NSF/ANSI 51 Certified mean ?

The presence of the NSF Mark on food service equipment means that the equipment has been evaluated, tested, and certified by NSF International as meeting international commercial food equipment standards. To earn the right to use the NSF Mark, a manufacturer must pass not only stringent evaluation and testing of its product, but also rigorous, unannounced inspections of its production facilities which are conducted on a routine basis.
